

T2m: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Diagnostic: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.

U10: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Diagnostic: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.

V10: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Diagnostics: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.

MSLP: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Diagnostic: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.

TP6: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Diagnostics: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.

T850: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Dagnostic: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.

Q700: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Diagnostic: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.

U850: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Diagnostic: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.

V850: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Diagnostics: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.

WS10: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Diagnostics: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.

WS850: original GraphCast and trained models · 1°

Eight 2023 starts · 30–60° latitude, both hemispheres · cosine weighting · powers averaged across starts

Diagnostic: baseline repeatability check failed; all three GC runs shown. Power agreement alone does not measure accuracy.
