

Res1: effect of resetting Mamba internal state

Mamba: carry train / carry eval Mamba: carry train / reset eval Mamba: reset train / reset eval

Relative to GraphCast-small baseline · 32 matched cold samples · 40 six-hour leads
Reset training = reset_every_anchor; reset evaluation = every step. Separate training runs.
Each curve uses its saved baseline (maximum difference 0.56%). RMSE diagnostic, not exact GraphCast loss.
